

Abdelrahman Shehata

Senior Flutter Engineer · Mobile & AI-Powered Apps

abdelrahman2490@gmail.com · Cairo, Egypt · +201121070429 · github.com/abdelrahman-shehata99 · www.linkedin.com/in/abdelrahman-shehata-9a20b41b1

SUMMARY

Senior mobile engineer with **6+ years** building and scaling production Flutter applications, including **iStoria** — a platform serving **5+ million users** with strong engagement across Saudi Arabia. Deep expertise in **Flutter, Dart, and Java**, with a focus on performance optimization, clean architecture, and reliable release engineering. Experienced integrating AI model endpoints to power personalization and recommendation features in live apps, and partnering closely with product, design, and backend teams to ship user-focused features with measurable impact.

EXPERIENCE

Mobile Application Developer

iStoria · Full-time | Jan 2025 – Present · Riyadh, Saudi Arabia (Remote)

- Build and maintain high-performance Flutter applications serving **5+ million users** across iOS and Android, keeping interactions smooth and responsive at scale.
- Designed a reusable component and animation system that standardized the UI across the app and accelerated delivery of new features.
- Integrated AI model endpoints powering personalization and recommendation features that increased user retention.
- Established a rigorous testing approach (unit, widget, integration) and a structured bug-triage process, **reducing user-reported issues by 30%**.

Mobile Application Developer (Flutter)

Drop Idea Company · Full-time | May 2022 – Nov 2024 · Istanbul, Turkey (Remote)

- Led multiple Flutter projects end-to-end — from architecture and state-management design through App Store and Play Store release — with an emphasis on scalability and maintainability.
- Mentored junior developers through structured code reviews and pair programming, raising team code quality and delivery speed.
- Built complex animations and interactive UI components that elevated the look and usability of client products.
- Managed client relationships and scope across concurrent engagements, earning repeat business and successful project renewals.

Mobile Application Developer

B.TECH · Full-time | May 2020 – Feb 2022 · Cairo, Egypt

- Built and maintained the logistics and internal-operations app, integrating with backend inventory and order-management systems.
- Designed offline-capable flows with efficient API sync, reducing friction for warehouse and field staff.
- Improved performance and stability across modules to deliver a more reliable internal logistics tool.
- Set up CI/CD pipelines and code-quality standards to streamline releases and ongoing maintenance.

EDUCATION

Bachelor of Engineering – Computer Science

El Shorouk Academy · 2018 – 2022

LICENSES & CERTIFICATIONS

Oracle Certified Professional, Java Programmer · Issued 2020

LANGUAGES

Arabic (Native) · English (Professional Working Proficiency)

SKILLS

Languages & Frameworks: Flutter · Dart · Java · Swift · JavaScript · HTML · CSS · PHP · Laravel

Flutter Architecture & State Management: Clean Architecture · MVVM · BLoC / Cubit · Riverpod · Provider · GetX · Dependency injection (get_it) · go_router · Feature-first modularization

Security & Authentication: Biometric auth (Face ID / Touch ID / fingerprint) · Secure storage (flutter_secure_storage, Keychain / Keystore) · SSL / certificate pinning · OAuth 2.0 / OpenID Connect · JWT & token refresh · Encryption at rest · Code obfuscation (R8 / ProGuard) · Root / jailbreak detection

Data, Sync & APIs: PowerSync (client-side SQLite, server sync) · SQLite · Drift · Hive · REST APIs · Dio / Retrofit · GraphQL · PostgreSQL · Redis · Firebase · AWS S3

Quality, CI/CD & Observability: Automated testing (unit, widget, integration) · Mockito · Golden tests · CI/CD (GitHub Actions, Codemagic, Fastlane) · Performance profiling · Sentry · Crashlytics · Firebase Analytics · Mixpanel

Localization, AI & Features: Arabic / English localization (intl) · RTL layout support · Push notifications (FCM) · Deep linking · AI model endpoint integration · Personalization & recommendations

Tools & Collaboration: Git (GitHub/GitLab) · Code review · Jira · Agile / Scrum · Figma handoff · Mentoring & technical leadership
